

INDIVIPRO

CARPETS & RUGS

Congratulations on your purchase!

Indivipro carpets & rugs offers an extensive variety of quality carpets and tapestries, available in a wide range of materials such as wool, silk, linen, bamboo, viscose, polyamide and handwoven polyester, numerous color options, and available in almost all required sizes.

Product specifications

Material **BALANCE** is a hand-tufted rug collection made of 100% Regenerated Nylon. This collection has a high resistance to light and low deviation in colour between lots.

Maintenance

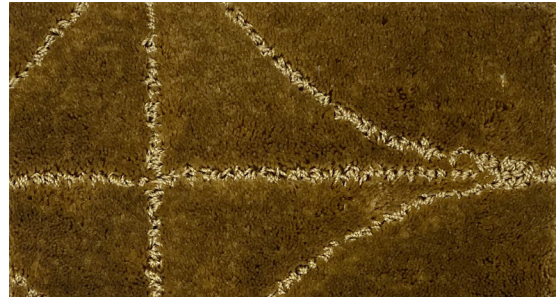

Regenerated Nylon rugs boast specific features, including high resistance to light and minimal color deviation between lots. Another notable characteristic is their easy maintenance.

Regular vacuuming is crucial for these rugs to clean them and restore the pile, especially in areas with heavy foot traffic and wear. Vacuuming not only removes dirt but also helps recover the pile and enhance the rug's quality. Avoid using central vacuums or low-powered ones; it's recommended to use a vacuum cleaner with at least 1200W of power.

Regularly rotating the rugs ensures even exposure to light and wear across the entire surface. When furniture applies pressure to the rug, consider using rug protection to prevent damage to the pile and preserve the overall appearance.

Regular cleaning is vital to maintain the rug's appearance. Use a high-quality vacuum cleaner with 1200W of power and vacuum in the direction of the pile. Regenerated Nylon rugs should be cleaned regularly, with lighter rugs requiring more frequent cleaning than darker ones. For these rugs, we recommend water cleaning with a neutral pH soap or detergent, ensuring the water temperature does not exceed 30°C.

For deeper cleaning, it's advisable to seek the assistance of a specialized rug cleaning company

Colour

Because of the nature of the quality each rug has its unique colour. The colour may differ and depend on each dye bath. Always avoid direct sunlight. Longer periods of exposure to direct sunlight will damage the rug and lead to discolouring.

Size deviation

Size deviations are up to about 3% possible. Because of the nature of this quality, this product can stretch a little bit.

Colour fastness to light

8 [very good]

Backing

The backing is made of polyester. Since it is used for the back side of the rugs there is no flame danger for backing as well. Polyester is a petroleum based material. This is as maximum eco-friendly as other petroleum based materials.

Anti-slip

Anti-slip is available separately in two different fixed sizes, as a roll for installation or fitted custom made to the carpet.

Extra information

Please do not store rolls packed longer than 3-4 weeks.

Warranty

Please refer to our regular terms.
