Product Specifications

Materials

The **TIDE** is a hand-tufted rug, available in 50% Bamboo with 50% New Zealand Wool. These fibers are products of nature and as with all natural products, a slight deviation in texture and colour may occur between dye lots.

Maintenance

Regular vacuuming is crucial to clean your rugs and restore the pile, especially in high-traffic areas where wear and tear are common. Additionally, rotating rugs regularly ensures uniform exposure to light and wear across the entire surface. When furniture exerts pressure on the rug, consider using rug protection to prevent damage to the pile and preserve its overall appearance.

Maintaining the appearance of your rug requires regular cleaning. Opt for a powerful vacuum cleaner, ideally with 1200W of power, and vacuum in the direction of the pile. Bamboo rugs, in particular, should be cleaned regularly. Lighter rugs may require more frequent cleaning than darker ones. Avoid steam cleaning or methods involving significant temperature increases. For Bamboo rugs, we highly recommend professional injection-extraction washing at low temperatures and pressures. For deeper cleaning, enlist the services of a specialized rug cleaning company.

Colours

The natural quality lends each carpet a unique colour. Colour intensity may vary depending on the dye bath. Avoid direct sunlight at all times. Longer exposure to sunlight will cause damage and fading.
